

User Story

DEAL01- CPQ flow — code generation, price check, and document signing

USER STORY

As a sales rep, I want to generate a quote code, verify the product price, and send the document for signing within the CPQ flow, so that I can complete the quote process without leaving the platform.

PRECONDITIONS

User is logged in with a Sales Rep role.

Product catalogue and pricing are configured.

e-Signature integration is active.

ACCEPTANCE CRITERIA

✓ Given a quote is created, a CPQ code is auto-generated — no manual entry. ✓ Given a product is selected, the price is pulled from the price book automatically. ✓ Given pricing is confirmed, the document is sent for e-signature from within the platform. ✓ Given the document is signed, the quote status updates to

Closed

. ✓ Given a discount is applied above the allowed limit, the quote is blocked until manager approval.

NOTES

Minor change — discount threshold validation is new. Threshold value is configurable by admin. No UI change needed for this; it's a backend rule.
